Per preservare la qualità del prodotto Aquaelite si raccomanda di pulire le superfici in finitura esclusivamente con acqua e sapone neutro asciugandole con un panno morbido.

Non utilizzare detergenti o detersivi abrasivi o contenenti alcool, acidi, candeggina, cloro, solventi chimici, spugne abrasive, paglie metalliche, etc.

L'acqua contiene calcare in quantità variabili, il quale può depositarsi sulla superficie del prodotto formando macchie e depositi. E' possibile evitare la formazione di macchie di calcare pulendo ed asciugando il prodotto dopo ogni utilizzo.

Per evitare la formazione di calcare sugli ugelli strofinarli periodicamente con un panno umido.

In order to maintain the quality of Aquaelite products, surfaces must be cleaned exclusively using soapy water and dried with a soft cloth. Never use detergents, powders or creams containing alcohol, acid, bleach, solvents, chemical agents, metal or abrasive sponges, etc.

Water contains limestone in variable quantity, which can remain on the surfaces leaving spots and forming deposits.

In order to avoid limestone deposits clean and dry the product immediately after use. It is possible to prevent limestone deposits on nozzles by regularly rubbing with a damp cloth.
